PLAN GUIDE 3 OF 4

Business Plan $76/mo

Full HR, payroll, inventory & project management for mid-size businesses. Everything in Growth, plus 15 new features, each with its status cycle and exact click-path. Zenith Interiors hires its first employee and takes on a full office fit-out project.

Scenario continues: Zenith Interiors hires Nadeesha Perera as Site Coordinator and wins a full HQ fit-out project for a new client, Horizon Retail Group.

Plan target: For mid-size businesses · **Users:** up to 100

This is guide 3 of 4 — builds on the Starter and Growth guides.

What's Included in Business

All 23 Starter+Growth features, plus 15 new ones (highlighted). This guide covers the 15 new ones in depth.

FEATURE	WHAT IT DOES
Employees	Employee Directory — records, departments, contacts.
Employee Onboarding	Structured new-hire workflow.
Payroll	Salary calculation, payslips, digital signatures.
PTO / Time Off	Requests, approval, balance tracking.
Attendance	Marking, shifts, reports.
Performance Reviews	Review cycles, goals, ratings.
Employee Self-Service Portal	Payslips, PTO, profile — for employees themselves.
Expense Claims	Reimbursement workflow + GL posting.
Time Tracking	Billable / non-billable, timer support.
Inventory	Stock, SKU, COGS posting.
Projects (+ Job Costing)	3-level Project → Contract → Items, with cost accumulation and margin tracking built in.
Assets	Fixed assets + depreciation.
Loans	Employee loans and repayment schedules.
Multi-Currency	FX rates, gain/loss tracking.
Budget Planning	Budget vs. actual variance analysis.
Chart of Accounts, GL, Journal Entries, Invoices, Customers, Receivables, Bills, Vendors, Payables, Tax, Reports, Documents, Import/Export, Analytics, Notes & Todos, Settings, Quotes, Sales Orders, Purchase Orders, Petty Cash, Subscriptions, Bank Reconciliation, Stripe Payments	*Still available — see Starter & Growth guides*

Phase 3 — Hiring & the Horizon HQ Project

Recap: Zenith Interiors now runs full quote-to-cash and purchase-to-pay cycles (Growth guide). Business is growing enough that Kavindu needs to hire, and Horizon Retail Group wants a much bigger job than the reception corner from before — a full HQ fit-out.

1 Employee Onboarding — cycle

Workforce → Employee Onboarding

What it is: A structured new-hire workflow — collects details and creates the employee record and portal login in one guided flow.

Cycle: Invited → Documents collected → Portal login activated → Active employee. If a hire falls through, it can be cancelled before completion.

FIELD	VALUE
Name	Nadeesha Perera
Role	Site Coordinator
Start date	**2026-07-01**

HOW TO ONBOARD HER

1. Go to *Workforce → Employee Onboarding → Start Onboarding*.
2. Enter Nadeesha's name, role "Site Coordinator", email, and start date 2026-07-01.
3. Click **Send Invite** — she receives an email to complete her personal details and upload ID documents.
4. Once she submits, click **Activate** to create her employee record and portal login.

Verify: Nadeesha appears in Employee Directory with an active portal login.

2 Employees (Directory)

Workforce → Employee List

What it is: Records, departments, and contact details for everyone on the team.

HOW TO USE IT

1. Go to *Workforce → Employee List*, open Nadeesha's record.
2. Set department to "Operations" and reporting manager to Kavindu.

Verify: Nadeesha's record shows department "Operations" and reports directly to Kavindu.

3 Attendance

Purchasing → Attendance

What it is: Marking, shifts, and attendance reports.

HOW TO RECORD IT

1. Nadeesha (or Kavindu on her behalf) clicks **Clock In** each morning she's on the Horizon site, and **Clock Out** at day's end.
2. Go to *Purchasing → Attendance → Reports* to see her monthly attendance.

Verify: The Attendance report shows her daily clock-in/out for July.

4 Time Tracking — cycle

Projects → Project Time

What it is: Billable/non-billable time entries with timer support — feeds directly into Job Costing.

Cycle: Timer started → Timer stopped (or manual entry) → Submitted → Approved by manager. Only approved billable hours count toward Job Costing.

FIELD	VALUE
Entry	**18 hours, billable, "Horizon HQ Fit-Out"**

HOW TO LOG IT

1. Go to *Projects → Project Time → Start Timer*, select project "Horizon HQ Fit-Out", mark as Billable.
2. Stop the timer at end of day (or add a manual 18-hour entry for the week instead).
3. Click **Submit** — Kavindu then clicks **Approve** on the Time Tracking approvals screen.

Verify: The hours appear against the project's cost accumulation once approved.

5 Projects (+ Job Costing) — cycle

Projects → Projects & Contracts

What it is: A 3-level structure (Project → Contract → Items) that accumulates every cost and every dollar of revenue tied to one job, with margin/variance tracking built in — so you can tell if a specific job was profitable.

Cycle: Planning → Active (costs and revenue accumulating) → Completed → Closed (final margin locked in).

FIELD	VALUE
Project	Horizon HQ Fit-Out — Phase 1
Customer	Horizon Retail Group
Budget	**LKR 3,000,000**

HOW TO SET IT UP

1. Go to *Projects → Projects & Contracts → New Project*.
2. Name it "Horizon HQ Fit-Out — Phase 1", link customer "Horizon Retail Group", set budget 3,000,000, status "Active".
3. Add a Contract under it, then Items (materials, labor) as they're purchased/logged.
4. Once delivered, click **Mark Completed**, then **Close Project** after final invoicing.

Verify: The Job Cost Report shows materials, labor (from Time Tracking), and margin once the project is invoiced.

6 Inventory — cycle

Assets & HR → Inventory

What it is: Tracks stock quantity and value by SKU, posting cost of goods sold (COGS) automatically when items are sold.

Cycle: Stock In (via a Purchase Order receipt) → On Hand → Stock Out (sold on a Sales Order/Invoice, or manually adjusted for damage/loss).

ITEM	QTY RECEIVED
Executive Office Desk (FRN-DSK-001)	10
Ergonomic Task Chair (FRN-CHR-002)	**20**

HOW TO SET IT UP AND RECEIVE STOCK

1. Go to *Assets & HR → Inventory → Products → Add Product*, create "Executive Office Desk" (FRN-DSK-001) and "Ergonomic Task Chair" (FRN-CHR-002) with cost/selling prices.
2. Raise a Purchase Order for these items from Ceylon Timber & Hardware (see Growth guide).
3. When the PO is received, stock levels increase automatically — no separate manual step needed.

Verify: Inventory value increases on receipt and COGS posts automatically once sold on a Sales Order/Invoice.

7 Assets — cycle

Assets & HR → Assets

What it is: Fixed assets — big purchases used over years, not expensed immediately — with automatic depreciation.

Cycle: Acquired → Depreciating (monthly depreciation posts automatically) → Disposed (sold/scrapped, any gain or loss on disposal posts to the GL).

FIELD	VALUE
Asset	Delivery Van — Toyota Hiace
Cost	LKR 3,200,000 · 5-year straight-line · LKR 200,000 salvage
Monthly depreciation	**LKR 50,000**

HOW TO ADD IT

1. Go to *Assets & HR → Assets → Add Asset*.
2. Name "Delivery Van — Toyota Hiace", cost 3,200,000, purchase date 2026-07-01, method "Straight-line", useful life 60 months, salvage value 200,000.
3. Click **Save** — BloomAudit calculates monthly depreciation automatically.

Verify: Accumulated Depreciation increases by LKR 50,000 each month the asset is active.

8 Expense Claims — cycle

Banking → Expense Claims

What it is: Reimburses employees for money they personally spent on company business, posting straight to the GL.

Cycle: Submitted → Approved (or Rejected) → Paid.

FIELD	VALUE
Claim	**Nadeesha — fuel to supplier & site, LKR 4,500**

HOW TO FILE AND PAY IT

1. Nadeesha goes to her *Employee Portal → Expense Claims → New Claim*, enters "Fuel to supplier & site", 4,500, attaches a receipt photo, and submits.
2. Kavindu reviews it under *Banking → Expense Claims* and clicks **Approve**.
3. Click **Mark Paid** once reimbursed via bank transfer.

Verify: Claim moves Submitted → Approved → Paid; LKR 4,500 leaves the bank account.

9 Loans — cycle

Banking → Loans

What it is: Tracks money the company lends an employee (e.g. a salary advance) and its repayment installments.

Cycle: Requested → Approved → Active (installments deducted each payroll run) → Fully Repaid.

FIELD	VALUE
Loan	**Nadeesha — LKR 50,000, 5 monthly installments of LKR 10,000**

HOW TO SET IT UP

1. Go to *Banking → Loans → New Loan*, select Nadeesha, amount 50,000, 5 monthly installments of 10,000.
2. Click **Approve** — the loan becomes Active and the first installment schedules against her next payslip.

Verify: The first LKR 10,000 installment is due against her next payslip; the loan auto-closes as "Fully Repaid" after the 5th installment.

10 Payroll — cycle

Workforce → Payroll

What it is: Salary calculation, payslip generation, and digital signatures.

Cycle: Draft payslip (auto-calculated) → Approved by admin → Signed by employee → Paid.

FIELD	VALUE
Payslip	**Nadeesha — July 2026, gross salary less LKR 10,000 loan installment**

HOW TO RUN IT

1. Go to *Workforce → Payroll → Run Payroll* for July 2026.
2. BloomAudit auto-generates Nadeesha's draft payslip, automatically deducting the LKR 10,000 loan installment.
3. Click **Approve** — Nadeesha is notified to review and digitally sign it from her Employee Portal.
4. Once signed, click **Mark Paid** after the bank transfer.

Verify: Nadeesha can view and digitally sign her payslip from the Employee Portal.

11 PTO / Time Off — cycle

Workforce → Time Off

What it is: PTO requests, manager approval, and running balance tracking.

Cycle: Requested → Approved (balance deducted) or Rejected (balance untouched).

FIELD	VALUE
Request	**Nadeesha — 2 days annual leave, 2026-08-10 to 2026-08-11**

HOW TO REQUEST AND APPROVE IT

1. Nadeesha goes to *Employee Portal* → *Time Off* → *New Request*, picks 2026-08-10 to 2026-08-11, reason "Annual leave", submits.
2. Kavindu goes to *Workforce* → *Time Off* and clicks **Approve**.

Verify: Kavindu approves it; her PTO balance reduces by 2 days.

12 Performance Reviews — cycle

Workforce → Performance Reviews

What it is: Review cycles, goals, and ratings for each employee.

Cycle: Scheduled → In Progress (goals set, self/manager assessment) → Completed (rating finalized).

FIELD	VALUE
Review	**Nadeesha — Q3 2026, goal: "Deliver Horizon HQ on schedule"**

HOW TO RUN IT

1. Go to *Workforce* → *Performance Reviews* → *New Review Cycle*, select Nadeesha, period Q3 2026.
2. Add goal "Deliver Horizon HQ on schedule", click **Schedule**.
3. At quarter end, complete the assessment and click **Finalize Rating**.

Verify: The review cycle shows as scheduled with the goal attached to Nadeesha's profile, then "Completed" with a rating at quarter end.

13 Employee Self-Service Portal

Employee Portal (separate login)

What it is: Lets employees log in themselves to view payslips, request PTO, and update their own profile — without going through an admin.

HOW TO USE IT

1. Nadeesha logs in at the Employee Portal URL with the credentials from her onboarding email.
2. She views her July payslip, checks her PTO balance, and updates her phone number under Profile.

Verify: Nadeesha logs in with her own credentials and sees her July payslip and PTO balance directly.

14 Multi-Currency

Reports → Multi-Currency

What it is: Handles invoices/bills in a foreign currency, converting to your base currency using the FX rate on the transaction date, and tracks realized/unrealized gain or loss.

FIELD	VALUE
Customer	A new overseas client paying in USD
Invoice	**$2,000 USD, converted to LKR at the day's rate**

HOW TO INVOICE IN A FOREIGN CURRENCY

1. Go to *Reports → Multi-Currency → Exchange Rates* and confirm today's USD/LKR rate is set (or enter it manually).
2. Create the invoice as usual (*Sales → Invoices → New Invoice*), but set currency to USD instead of LKR.
3. When the customer pays, record the payment — if the rate moved since issue, BloomAudit calculates the FX gain/loss automatically.

Verify: The FX Report shows the gain/loss once the invoice is paid at a different rate than it was issued.

15 Budget Planning

Reports → Budgets

What it is: Set a budget per period/cost centre and see variance against actuals.

FIELD	VALUE
Budget	Horizon HQ Fit-Out — LKR 3,000,000
Actual so far	**Materials + labor + van depreciation posted this month**

HOW TO SET IT UP

1. Go to *Reports → Budgets → New Budget*, link it to the "Horizon HQ Fit-Out" project, amount 3,000,000, period July–September 2026.
2. Click **Save** — actuals populate automatically from every Bill, PO, Asset depreciation, and Time Tracking entry tagged to that project.

Verify: The variance report shows actual spend tracking under/over the LKR 3,000,000 budget.

End of Business — Zenith Interiors now runs full HR, inventory, and project costing alongside its accounting.
