PLAN GUIDE 2 OF 4

Growth Plan $36/mo

Sales pipeline, purchasing & banking for growing SMBs. Everything in Starter, plus 7 new features — each explained with its full status cycle and the exact clicks to use it. This guide continues Zenith Interiors' story one year later.

Scenario continues: Zenith Interiors has repeat clients now and needs formal quotes, purchase orders to suppliers, a real bank account, and online payments.

Plan target: For growing SMBs · **Users:** up to 25

This is guide 2 of 4 — see the Starter guide for the 16 foundational features still in use every day.

What's Included in Growth

All 16 Starter features, plus 7 new ones (highlighted). This guide covers the 7 new ones in depth — see the Starter guide for the rest.

FEATURE	WHAT IT DOES
Quotes	Quote Generator with follow-up reminders — send a price quote before it becomes an invoice.
Sales Orders	Track orders placed by customers, linked to invoices and fulfilment.
Purchase Orders	Request and track vendor purchases, with an approval workflow + email notifications.
Petty Cash	Track small day-to-day cash spend.
Subscriptions	Manage recurring vendor charges (rent, software, service contracts).
Bank Reconciliation	Bank accounts + matching bank statements to your books.
Stripe Payments	Stripe payment integration + payment links on invoices.
Chart of Accounts, GL, Journal Entries, Invoices, Customers, Receivables, Bills, Vendors, Payables, Tax, Reports, Documents, Import/Export, Analytics, Notes & Todos, Settings	*Still available — see Starter guide*

Phase 2 — Winning Bigger Jobs

Recap: Zenith Interiors (Kavindu Perera) has been running on BloomAudit for a year using Invoices, Bills, Customers, and Vendors. A prospective client, Horizon Retail Group, wants a proper quote before committing to a small office corner fit-out.

1 Quotes — full cycle

Projects → Quote Generator

What it is: A formal price quote sent to a prospective customer before any commitment — with automatic follow-up reminders if they go quiet.

Cycle: Draft → Sent → Accepted or Rejected (or Expired, if a validity date passes with no response). An Accepted quote converts directly into a Sales Order — nothing is re-typed.

FIELD	VALUE
Quote	QT-2026-0001 — Reception corner refresh
Customer	Horizon Retail Group
Amount	LKR 180,000
Follow-up reminder	**7 days after send if no response**

HOW TO PLACE THE QUOTE

1. Go to *Projects → Quote Generator → New Quote*.
2. Select customer "Horizon Retail Group", add a line item "Reception corner refresh" for 180,000, and set a validity date 30 days out.
3. Click **Send** — the quote emails to Horizon and a 7-day follow-up reminder is scheduled automatically.
4. When Horizon replies, open the quote and click **Mark Accepted** (or **Mark Rejected**).
5. On acceptance, click **Convert to Sales Order**.

Verify: Horizon Retail Group accepts the quote; it converts cleanly into a Sales Order with the same line items and amount.

2 Sales Orders — full cycle

Sales → Sales Orders

What it is: A confirmed order from a customer, before you've invoiced them — the sales-side mirror of a Purchase Order, tracking fulfilment.

Cycle: Open → Fulfilled (goods/work delivered) → Invoiced → Closed. A Sales Order can be Cancelled before fulfilment if the customer backs out.

FIELD	VALUE
Sales Order	SO-2026-0001, converted from QT-2026-0001
Amount	**LKR 180,000**

HOW TO WORK THE ORDER

1. Open SO-2026-0001 (created automatically from the accepted quote).
2. Once the reception corner work is done, click **Mark Fulfilled**.
3. Click **Create Invoice from Sales Order** — this pre-fills the invoice with the SO's line items.

Verify: The SO links back to the accepted quote and forward to the invoice once billed; status moves to "Invoiced" then "Closed" once fully paid.

3 Purchase Orders — full cycle

Purchasing → Purchase Orders

What it is: A formal request to a vendor to buy goods at agreed prices, with an approval workflow and automatic email notifications — a commitment to buy, not yet a bill.

Cycle: Draft → Pending Approval → Approved → Sent to vendor → Partially Received / Received → Closed. Can be Rejected at the approval step instead of Approved.

FIELD	VALUE
PO	PO-2026-0001 — Reception furniture from Ceylon Timber & Hardware
Amount	**LKR 95,000**

HOW TO PLACE THE PO

1. Go to *Purchasing → Purchase Orders → New PO*.
2. Select vendor "Ceylon Timber & Hardware", add line items totalling 95,000.
3. Click **Submit for Approval** — a manager (or Kavindu himself, as Super Admin) must approve it.
4. Click **Approve** — this automatically emails the PO to the vendor.
5. When goods arrive, open the PO and click **Receive**, entering the quantity actually delivered.

Verify: The PO requires approval before it's sent; the vendor gets an automatic email once approved; status moves to "Received" once goods arrive, then "Closed" once billed and paid.

4 Petty Cash — cycle

Purchasing → Petty Cash

What it is: A small physical cash float for tiny day-to-day purchases too small for a formal bill.

Cycle: Float issued → Expenses logged against it → Replenished (topped back up) once the float runs low, repeating indefinitely.

ITEM	AMOUNT
Float issued	LKR 5,000
Site tape & fixings	**LKR 1,100**

HOW TO USE IT

1. Go to *Purchasing → Petty Cash → Issue Float*, enter 5,000, save.
2. Click **Log Expense**, enter "Site tape & fixings", 1,100, save.
3. Once the float is running low, click **Replenish** to top it back up to 5,000.

Verify: LKR 3,900 remains in the float after the spend, and the expense posts to the GL automatically.

5 Subscriptions — cycle

Purchasing → Subscriptions

What it is: Tracks an ongoing vendor charge — rent, software, a service contract — instead of re-entering a fresh bill every period.

Cycle: Active (charges recur automatically on schedule) → Paused (temporarily stopped, can resume) → Cancelled (ended for good).

FIELD	VALUE
Vendor	City Business Park (Pvt) Ltd
Description	Workshop rent
Amount	**LKR 45,000 / month**

HOW TO SET IT UP

1. Go to *Purchasing → Subscriptions → New Subscription*.
2. Vendor "City Business Park (Pvt) Ltd", description "Workshop rent", amount 45,000, frequency monthly.
3. Click **Activate**.

Verify: Subscription shows "Active" with a next-charge date, and a bill for LKR 45,000 generates automatically on that date.

6 Bank Reconciliation — cycle

Banking → Accounts / Bank Reconciliation

What it is: A real company bank account, plus the process of matching your bank statement line-by-line against your books to catch mistakes or unrecorded charges.

Cycle (per statement line): Unreconciled → Matched (linked to an existing book entry) or a new entry created for it → Reconciled. A reconciliation session is only "done" once every line is matched and the book balance equals the statement balance.

FIELD	VALUE
Account	Commercial Bank of Ceylon — Current A/C
Statement line	**−45,000 rent debit, +90,000 Horizon deposit, −650 bank charge**

HOW TO SET UP THE ACCOUNT AND RECONCILE

1. Go to *Banking* → *Accounts* → *Add Account*, enter "Commercial Bank of Ceylon — Current A/C" and opening balance.
2. Go to *Banking* → *Bank Reconciliation*, select the account, and upload or manually enter the statement lines.
3. Match the −45,000 line to the Subscription's auto-generated rent bill payment, and the +90,000 to the Horizon invoice payment.
4. The −650 bank charge won't match anything — click **Add as New Transaction** to record it as a bank charge expense.
5. Click **Finish Reconciliation** once book balance = statement balance.

Verify: Book balance = statement balance once all three lines are matched or recorded; the reconciliation session shows "Complete".

7 Stripe Payments — cycle

Sales → Invoices → Send with payment link

What it is: Lets a customer pay an invoice online via a Stripe-hosted checkout link, instead of a bank transfer or cheque.

Cycle: Payment link created → Pending (customer hasn't paid yet) → Paid (invoice auto-updates) — or Expired if the customer never completes checkout.

HOW TO SEND IT

1. First, go to *Tools* → *Settings* → *Payments* and connect your Stripe account (one-time setup).
2. Open the Horizon invoice, and when sending, check **Include payment link**.
3. Click **Send** — the customer's email includes a "Pay Now" button.

Verify: The invoice email includes a working Stripe checkout link; once paid, the invoice auto-updates to "Paid" and the payment appears in Bank Reconciliation once it settles.

End of Growth — Zenith Interiors now runs a full quote-to-cash and purchase-to-pay cycle with real banking.

Full Feature Checklist (New in Growth)
