BloomAudit
Secure • Compliant • Reliable

PLAN GUIDE 1 OF 4

Starter Plan $26/mo

Core double-entry accounting for freelancers, sole traders, and micro-businesses. This guide walks through every one of the 16 Starter features — what each one is, its full status cycle where it has one, the exact clicks to use it, and how to verify it worked — using one realistic origin story.

Scenario: Kavindu Perera launches Zenith Interiors as a one-person consultancy and does his first month of bookkeeping in BloomAudit.

Plan target: For freelancers & micro-businesses · **Users:** up to 5

This is guide 1 of 4 — Zenith Interiors grows through Growth, Business, and Enterprise in the guides that follow.

What's Included in Starter

All 16 features, with the exact description shown on the pricing page.

FEATURE	WHAT IT DOES
Chart of Accounts	System + custom accounts — the master list every transaction ultimately posts to.
General Ledger	The complete, detailed record of every transaction posted to every account.
Journal Entries	Draft, post & reverse manual accounting entries.
Invoices	Send invoices with partial payments, credit notes & aging.
Customers	Customer database — contacts, terms, credit limits.
Receivables	Receivables tracking & aging reports.
Bills	Bill management — full AP workflow.
Vendors	Vendor database.
Payables	Payables tracking & aging reports.
Tax	Tax management (VAT / GST / WHT).
Reports	Financial statements — P&L, Balance Sheet, Cash Flow, Trial Balance.
Documents	Document Bank — file storage + audit trail.
Import / Export	Bulk import/export of invoices, bills, customers, vendors.
Analytics	Analytics dashboard — financial KPIs.
Notes & Todos	Personal notes and task tracking on your Home dashboard.
Settings	App settings, RBAC & company branding.

Phase 1 — First Month of Books

Kavindu just registered Zenith Interiors and is setting up BloomAudit for the very first time.

1 Settings

Tools → Settings

What it is: App settings, role-based access control (RBAC), and company branding — the first thing to configure on a brand-new account.

FIELD	VALUE
Company name	Zenith Interiors
Country	Sri Lanka (LKR base currency)
Roles	**Kavindu keeps the default Super Admin role — he's the only user for now**

HOW TO SET IT UP

1. Go to *Tools* → *Settings* → *Company Profile*.
2. Enter "Zenith Interiors" as the company name, select Sri Lanka as the country, and upload a logo (optional).
3. Click **Save**.
4. Under *Roles*, confirm Kavindu's account is assigned the "Super Admin" role.

Verify: Company Profile shows Zenith Interiors with a logo placeholder and LKR as the base currency.

2 Chart of Accounts

Accounting → Chart of Accounts

What it is: The master list of every account your business tracks money in and out of — every other transaction in this guide posts to one of these accounts.

HOW TO CHECK IT

1. Go to *Accounting* → *Chart of Accounts*.
2. Confirm the default accounts already exist — 1000 Cash, 1100 Accounts Receivable, 2000 Accounts Payable, 4000 Revenue, 5000 Cost of Goods Sold, and more.
3. Optional: click **Add Account** to create a custom account (e.g. "4200 Consulting Revenue") if you want to separate a specific income type.

Verify: The default accounts are present; a custom account, if added, shows up immediately in the list and in the account picker on other screens.

3 Journal Entries

Accounting → Journal Entries

What it is: The manual, direct way to post a debit/credit straight to the ledger — used for anything that doesn't come from a normal invoice/bill screen, like an opening balance.

Cycle: Draft → Posted → (optionally) Reversed. A reversed entry creates an equal-and-opposite entry rather than deleting the original, so the audit trail is never broken.

ENTRY (JE-2026-0001)	DEBIT	CREDIT
1000 · Cash	150,000	—
3000 · Owner's Equity	**—**	**150,000**

Kavindu's opening capital — LKR 150,000 he's putting into the business bank account.

HOW TO POST IT

1. Go to *Accounting → Journal Entries → New Entry*.
2. Set the date to 2026-07-01 and description "Opening capital".
3. Add line 1: account 1000 Cash, Debit 150,000.
4. Add line 2: account 3000 Owner's Equity, Credit 150,000.
5. Click **Post** (not just Save Draft) so it actually hits the ledger.

Verify: The entry balances (150,000 = 150,000) and posts without error; it now appears in the General Ledger under both accounts.

4 Customers

Sales → Customers

What it is: The record of every person/company who buys from you.

FIELD	VALUE
Name	Coral Bay Retailers
Contact	Priya Fernando
Payment terms	**NET15**

HOW TO ADD ONE

1. Go to *Sales → Customers → Add Customer*.
2. Enter name "Coral Bay Retailers", contact "Priya Fernando", email, and payment terms "NET15".
3. Click **Save**.

Verify: Coral Bay Retailers appears in the customer list with an auto-generated customer number (e.g. CUST-0001).

5 Invoices — full cycle

Sales → Invoices

What it is: The bill you send a customer for work delivered — creates a receivable (money they now owe you). Supports partial payments and credit notes.

Cycle: Draft → Sent → Partially Paid → Paid. Also possible at any point before fully paid: Void (cancelled, no money owed) or a Credit Note issued against it (reduces what's owed without voiding the whole invoice). If the due date passes unpaid, it shows as Overdue instead of just Sent.

FIELD	VALUE
Invoice	INV-2026-0001 — Small office corner consultation
Customer	Coral Bay Retailers
Amount	**LKR 35,000**

HOW TO PLACE THE INVOICE

1. Go to *Sales → Invoices → New Invoice*.
2. Select customer "Coral Bay Retailers"; the billing address auto-fills.
3. Add a line item: description "Small office corner consultation", quantity 1, unit price 35,000.
4. Set the issue date and due date (NET15 auto-calculates the due date from the invoice date).
5. Click **Save as Draft** first to review, then click **Send** — this emails the invoice to Priya Fernando and moves it to "Sent".

HOW TO RECORD THE PAYMENT (THE REST OF THE CYCLE)

1. Open INV-2026-0001 and click **Record Payment**.
2. Enter amount 20,000, payment method (bank transfer), and date.
3. Save — the invoice status changes to "Partially Paid" with LKR 15,000 remaining.
4. When the remaining LKR 15,000 arrives, repeat **Record Payment** for that amount — status becomes "Paid".

Verify: Revenue and Accounts Receivable both increase by LKR 35,000 the moment it's sent; each payment reduces the outstanding balance and is visible in the invoice's payment history.

6 Receivables

Sales → Receivables

What it is: Monitors which invoices are unpaid, partially paid, or overdue, and when payment is due — a live view built from every invoice's payment status, not a separate thing you create.

HOW TO USE IT

1. Go to *Sales → Receivables*.
2. Filter by "Partially Paid" to see INV-2026-0001 with LKR 15,000 outstanding.
3. Use the aging columns (Current / 1-30 / 31-60 / 60+ days) to spot anything getting old.

Verify: INV-2026-0001 shows "Partially Paid", LKR 15,000 still outstanding, within NET15 terms (not yet in an aging bucket past due).

7 Vendors

Workforce → Vendors

What it is: The record of every supplier you buy from.

FIELD	VALUE
Name	**ColorPro Paints & Supplies**

HOW TO ADD ONE

1. Go to *Workforce → Vendors → Add Vendor*.
2. Enter name "ColorPro Paints & Supplies" and contact email.
3. Click **Save**.

Verify: The vendor record is saved and selectable when raising a bill.

8 Bills & Payables — full cycle

Purchasing → Bills

What it is: *Bills* record what a vendor invoiced you — the full AP workflow. *Payables* tracks and ages every bill you haven't paid yet, the mirror of Receivables.

Cycle: Draft → Received (goods/services confirmed in) → Partially Paid → Paid. Like invoices, a bill can go Overdue if unpaid past its due date, or be Voided before payment.

FIELD	VALUE
Bill	BILL-2026-0001 — Paint & primer for site samples
Vendor	ColorPro Paints & Supplies
Amount	**LKR 8,500**

HOW TO PLACE THE BILL

1. Go to *Purchasing → Bills → New Bill*.
2. Select vendor "ColorPro Paints & Supplies".
3. Add a line item: "Paint & primer for site samples", amount 8,500.
4. Set the bill date and due date, then click **Save** — this records it as Received.

HOW TO PAY IT

1. Open BILL-2026-0001 and click **Record Payment**.
2. Enter the full amount 8,500 and payment method, then save.

Verify: Accounts Payable increases by LKR 8,500 on save; the Payables aging view shows it due within terms, then disappears from "unpaid" once marked Paid.

9 Tax

Settings → Tax Settings / Reports → Tax Report

What it is: Configures and reports on VAT/GST/WHT so invoices and bills calculate the right tax automatically.

FIELD	VALUE
Tax rate	**VAT 18%**

HOW TO CONFIGURE IT

1. Go to *Tools → Settings → Tax Settings → Add Tax Rate*.
2. Name it "VAT 18%", rate 18, and mark it as the default output tax rate.
3. Save — this rate is now selectable on invoice/bill line items.

Verify: Applying "VAT 18%" to an invoice line adds the tax amount automatically, and it appears as output VAT collected in *Reports → Tax Report*.

10 Reports (Financial Statements)

Reports → Financial Statements

What it is: P&L, Balance Sheet, Cash Flow, and Trial Balance — built automatically from everything posted so far.

HOW TO VIEW THEM

1. Go to *Reports → Financial Statements*.
2. Pick "Trial Balance" and set the date range to July 2026.

Verify: The Trial Balance shows debits = credits after the opening entry, invoice, and bill above.

11 Documents

Tools → Document Bank

What it is: File storage with an audit trail — a place to keep contracts, signed quotes, and receipts tied to the business.

HOW TO USE IT

1. Go to *Tools → Document Bank → Upload*.
2. Choose the signed consultation agreement PDF for Coral Bay Retailers and upload it.
3. Optionally tag it "Contracts" for easy filtering later.

Verify: The file appears in Document Bank with an upload timestamp and uploader recorded.

12 Import / Export

Reports → Import / Export

What it is: Bulk import or export invoices, bills, customers, and vendors — useful for bringing in existing records from a spreadsheet.

HOW TO IMPORT

1. Go to *Reports → Import / Export → Import Customers*.
2. Download the CSV template, fill in 5 old customer contacts from his personal spreadsheet, and upload it.
3. Review the preview screen for errors, then click **Confirm Import**.

Verify: All 5 customers appear in the Customers list with no duplicate entries.

13 Analytics

Tools → Data Analytics

What it is: A financial KPI dashboard — revenue, outstanding receivables, upcoming payables, at a glance.

HOW TO USE IT

1. Go to *Tools → Data Analytics*.
2. Select the "This Month" filter to see July's numbers.

Verify: The dashboard reflects the LKR 35,000 invoice and LKR 8,500 bill entered above.

14 Notes & Todos

Home dashboard widgets

What it is: Lightweight personal notes and a task list, right on the Home screen.

Cycle (Todos only): Open → Done. Notes have no cycle — they're just freeform text you can edit or delete.

TYPE	CONTENT
Note	"Coral Bay wants a follow-up quote for the reception area."
Todo	**"Chase remaining LKR 15,000 from Coral Bay by 2026-08-01"**

HOW TO ADD THEM

1. On the Home dashboard, find the *Notes* widget and click the **+** icon — type the note and save.
2. Find the *Tasks* widget and click **+** — type the todo, set a due date of 2026-08-01, and save.
3. Once the LKR 15,000 is chased successfully, tick the todo to mark it Done.

Verify: Both appear on the Home dashboard's Notes and Tasks widgets; ticking the todo moves it out of the "remaining" count.

End of Starter — Zenith Interiors now has a complete, balanced set of books for its first month.
